ABOUT ME

Hello, I am Yusuf Çolak. I have completed two degrees, one in Bachelor's and the other in Associate's, during my time at university. I have honed my skills as a Full Stack Web Developer with Workintech. I possess experience in technologies such as JavaScript, React.js, and Node.js. My passion lies in creating user-centric, interactive web applications. I take pleasure in finding creative solutions and continuously improving myself with a strong drive for learning. I eagerly look forward to encountering new challenges in diverse projects.

PROJECTS

Pizza Order

2023

- Introducing my pizza ordering page, a captivating project showcased in my frontend developer portfolio. Developed using React, this interactive webpage demonstrates my proficiency in utilizing essential tools such as Axios, Router, Cypress, and Yup. Seamlessly blending functionality and aesthetics, the pizza ordering page offers a delightful user experience, allowing customers to effortlessly customize their pizza selections and place orders with just a few clicks. With its sleek design and smooth navigation, this project exemplifies my expertise in creating engaging and responsive interfaces.
- Utilized Software: React.js · Axios · Redux · JavaScript · HTML5 · CSS3 · Project Management · REST API

fizza-aciktim.netlify.app

Ticket Sales Site

2023

- My project aims to create a bus ticket selling website with specific core features. The website includes a ticket inquiry screen and a ticket selection screen on the homepage. Additionally, it consists of pages for user login, registration, and ticket management.
- I developed the project as a full-stack application, handling both frontend and backend development. For the frontend, I utilized React with Typescript, while for the backend, I employed Node.js with Express.

EXPERIENCE

Biomedical Engineering

12/2021 - 12/2022

Smart Software Sağlık A.Ş.

Afyonkarahisar

I worked at a company engaged in Research and Development (R&D) activities in the healthcare sector. During my time at the company, I focused on three-dimensional designs, some minor software tasks, three-dimensional printing processes, and electronic circuit operations.

EDUCATION

Full Stack Developer

03/2023 - Present

Workintech

- Workintech is a dynamic online educational platform dedicated to nurturing tech talent. We specialize in transforming individuals with no prior tech knowledge into proficient software developers and data scientists within a short span of six months. Our immersive learning approach involves hands-on experience and collaborative project work, allowing students to tackle real-world challenges in teams.

Biomedical Engineering

2019 - 2022

Afyon Kocatepe University

Biomedical Device Technology

2017 - 2019

Süleyman Demirel University
